FURTHER INSTRUCTIONS

1. READ THE INSTRUCTIONS GIVEN ON THE DISC.

2. ALWAYS USE NEW BRANDED DS/DD DISCS. IF THERE ARE SHORT TRACKS ON THE DISC THEN HIGH DENSITY DISCS SHOULD BE USED.

GENERAL INSTRUCTIONS FOR MAKING BACKUP COPIES

1. COPY THE WHOLE DISC IN THE MAIN MODE. THE MFM ANALYZER WILL HELP YOU IDENTIFY THIS BY READING SEVERAL OF THE MIDDLE TRACKS AND SELECTING THE INFO ICON TO GIVE THE BEST METHOD OF COPYING.

2. RESET THE PARAMETERS SO THAT YOU ARE COPYING JUST TRACK 0, HEAD 1. THIS TRACK IS THEN COPIED USING A DIFFERENT METHOD AND MODE. AGAIN THE MFM ANALYZER CAN BE USED TO IDENTIFY THIS. HOWEVER, ON THIS TRACK 'SYNCRO INDEX' IS OFTEN IDENTIFIED AS 'SOFTWARE INDEX'.

3. IF 'LONG' OR 'SHORT' TRACKS APPEAR THEN 'STRONG BITS' SHOULD BE TURNED ON.

4. ON SOME DISCS, TRACKS 79 AND-OR 80 WILL ALSO BE COPIED IN A DIFFERENT MODE. THESE WILL OFTEN SHOW AS ERRORS ON THE FIRST PASS AND SHOULD BE EXAMINED USING THE MFM ANALYZER.

WE REGRET THAT WE CANNOT ENTER INTO ANY DISCUSSION OR CORRESPONDENCE OR DEMONSTRATION ON HOW TO COPY SPECIFIC COPYRIGHTED SOFTWARE AS THIS WOULD CONTRAVENE THE COPYRIGHT ACT.
